## ABOUT THE DEPARTMENT

The Department was established in 1998 with two UG programmes and one PG programme. Considering the fact that India is thrusting itself as the leader into the information technology era, the department aims to impart high quality education and prepare the young men and women to challenge the ever-demanding IT field. The curriculums of the courses are designed to give strong foundation in all technical aspects of computers and its applications and also to develop the communication and soft skills of the students. Apart from making them good IT professionals, the department takes care to instill strong moral values into each individual to make them good citizens of our nation to serve the industry and society constructively

## ABOUT THE SPEAKER

Ms. C. Sangeetha works as a Software Trainer at FIIT, Chennai a pioneer institute in software training and development. She is an Electronics Engineering Graduate and has extensive knowledge and development ability in Application Development, Cloud Computing and IOT solutions. She has also served in leadership positions for Application Development and Cloud Computing with several industries and institutions. Her skill set includes working with domains like Web Application Development, Android Application Development, Software Development, and Cloud Computing. She is also well versed with various software languages, databases, development /testing/cloud computing tools and web application servers.

## ABOUT THE WORKSHOP

Android is a free, open source mobile platform. It is a Linux – based, multiprocessing, multithreaded OS. Android provides a rich application framework that allows you to build innovative apps and games for mobile devices. It provides an adaptive app framework that allows you to provide unique resources for different device configuration.

The main objective of this workshop is to give you an idea on how to start developing applications for mobile devices using Android OS. The workshop contents are designed to give you live demos and hands – on experience in developing Android apps.

### WORKHOP CONTENTS

- • History & Introduction
- • Installation and SDK
- • Layout managers
- • Event Handling
- • Data base connectivity
